

Product Backlog

As the election official,
I want to make sure to only count
for ballots that have at least half of
the candidates ranked,
So that ballots that do not meet
this standard are determined to
be invalidated when the election is
run.

- Acceptance Criteria:
- Be able to catch invalidated ballots during the process of running the voting system
 - Be able to calculate the ratio between the rankings and the number of candidate for each ballot during each vote distribution
 - Passes all unit tests
 - Passes all possible cases specified by the csv files

Effort: Medium

As the election official,
I want to have a short report in
addition to an audit report
So that the short report can be
printed and given to the election
certification officials.

- Acceptance Criteria:
- Include date, type of election, the candidates, # seats and the winner of the election
 - No losers list is included in the short report
 - Passes all unit tests
 - Passes all possible cases specified by the csv files

Effort: Small
